**Mini HL**

To the casual eye, the newest version of the car that changed the world of motoring may seem little different from its predecessors. But look again. The new Mini HL incorporates a wide range of new features inside, outside and under the bonnet, which help it maintain its position as the unrivalled leader in the small car field.

For a start there's the new livery: the new badge, new bumpers, smart new wheel trims. Take a cool all round look through the new tinted glass.

Then turn on the engine – and listen. Austin Morris have installed a comprehensive sound insulation system that doesn't stop at the interior surfaces but takes care of the engine compartment too. Result? A dramatic reduction in the overall noise level. We'll tell you more about the acoustic pack in three pages' time, but for more new features, see inside...

Our new face for the world to see: new badge, new bumpers

The hinged side rear windows give the passengers excellent ventilation without draughts. The heated back window is standard equipment on all Mini saloons

The Mini HL is elegantly short: the smart new wheel trim is as decorative as it's protective

Automatic transmission is optional at extra cost with the Mini HL

Nice to handle: the neat new gear lever knob
Mini HL

It's when you open the door and climb into the Mini HL that the transformation of Britain's best-loved car becomes most apparent.

Notice the brilliant new shadow check seat facings with handsome new vinyl sides, backs and borders. Savour the comfort: both driver and passenger seats have rake adjustable frames so that whether you are lift 2in or a loan six footer you ride at ease as well as in style. There's loss of a glare from the rest of the world thanks to the new tinted glass, and the new door bins are handy for holding your handbag, spectacles, maps and guidebooks.

For the driver there's easier handling: the new 4-spoke soft feel steering wheel is a delight to hold, the newly designed gear lever knob a pleasure to shift. The instruments are grouped in a twin-pack binnacle that gives you all the information you need on speed, fuel, battery and lights, with crystal clarity.

Everywhere you look there are unexpected new touches – the longer matt black wiper arms and blades for instance and the new window regulators – that proclaim the up-to-the-minute freshness of the car that has always been in the vanguard of fashion since it first came into being 21 years ago.

MinipassionMini.com
Mini. How it makes the most of its features.

Visibility. The Mini saloon gives you 91% visibility, the maximum possible without weakening the rugged frame.

The basic purpose of the Mini—a small town car for personal transport that is economical to run, agile in traffic, carries all the luggage that one or two people are likely to require and is fun to drive—has never changed. Nor has its basic shape. Sir Alec Issigonis designed it as a rugged chassis with a transverse engine and front wheel drive, a wheel at each corner for maximum stability and rack-and-pinion steering to give quick-as-a-wish manoeuvrability.

No other small car is so adept at weaving through traffic. So easy to park in a small, confined space. Offers such excellent visibility or such a large load-carrying capacity inside such small dimensions. The saloon models give you 5 cubic feet of boot space, the estate version 16 cubic feet with the rear seat in position, 36 cubic feet when it's down.

The Mini is averse to a little extra work. Even with a full complement of four adults and a bootful of luggage it will tow an eight-hundredweight trailer, an ability that is very welcome when it takes a family on holiday.

One of the most important features of the Mini is its economy. Averaging 40 miles per gallon, it drinks less and achieves longer distance on a tankful of petrol than almost any other car. And with its remarkably large tank for its size—75 gallons—it will travel over 300 miles between petrol stations. Fuel economy is only one aspect of the Mini's thrift. Because it is so well engineered and so tough, depreciation is far less than with most cars. A Mini will hold its second-hand price long after its competitors have been consigned to the scrapyard.

The concept of the Mini is unique. Many of its features are unique. Certainly its performance is unique. That's why the Mini is the ideal round-town runabout, the premier small car in the world.

Manoeuvrability. The Mini turns in just 28 feet, outstripping its rivals by a margin when there's a tiny parking space to fill.

The Mini has been a familiar feature of British roads for so long that many people take it for granted. This is not surprising: many of today's Mini drivers were not yet born when the Mini was first introduced in 1959. But no other car in history has won so many friends and admirers among the motoring public.

The launch of the latest models affords a splendid opportunity to recall some of the highlights of the Mini's triumphant career.

1959 Birth of a Legend. The year in which Sir Alec Issigonis's brilliant creation saw the light of day: the unorthodox little car designed to transport four people without a lot of waste in any sense of the word. Its excellence was immediately recognised by both public and private motorising enthusiasts. In its first year the Mini won a coveted major award for Technical Achievement.

1960 Baby's first Savings. The Mini won the Mobil Economy Run—filled 2nd and 3rd places too! In the same year, a Mini driven by Donald and Eric Morley won its class at the Geneva Rally.

1961 Start of Something Magic. Following suggestions from John Cooper, World Champion Formula One racing car constructor, the Mini Cooper went into production.

1964 Year of Firsts. The Cooper S won the Monte Carlo Rally outright for the first time, an achievement it repeated in 1965 and 1967. At the Motor Show the Mini exhibited the first 4-speed automatic gearbox to be fitted in a small car.

1967 New Design for Town and Country. The introduction of the 1000 super de luxe saloon and estate models with 998 cc engine and remote Cooper-type gearshift.

1969 The First Two Million. In this year Mini production passed the two million milestone and a new Mini 1000 model was introduced with wind-up windows, concealed door hinges, dry core wiper mechanism, and rearexhaust, open opening rear quarterlights and mechanical fuel pump.

1973 Quicker shift for the Mini. A new nod shift gear-change replaced the direct change system and made the Mini even nippier. At the same time it became the first low-price car with heated rear window, driver's door mirror, alternator and radial ply tyres as standard equipment.

1979 New Mini! It created an unheard of sensation when the Company announced a price reduction: the City was introduced at a price 5% lower than the current model. These are just a handful of the memorable moments that have marked the Mini's illustrious career. The basic concept of the Mini has never altered. New modifications and continual improvements have kept it permanently in the forefront for its style, its performance, its sheer technical excellence.

Mini. The little car with big ideas.

Small is beautiful—and satisfying. The features that make the Mini the most desirable small car in the world.
Mini HL Estate

The new version of the Mini Estate boasts many of the features you find in the new HL Saloon.

New shadow check seat facings with handsome vinyl borders; new 4-spoke soft feel steering wheel that won’t become sticky in hot weather or clammy in cold, new door bins, a new gear lever and window regulators. The new look badge to give the Estate grille a face-lift.

We haven’t tampered with the overall design. We wouldn’t dare. For the Estate has won a special place in the affections of its owners and admirers for its ability to offer more interior space than seems possible in such compact outside dimensions.

The Mini HL Estate offers 16 cubic feet of loadspace with the rear seat in position, a staggering 36 cubic feet of loadspace when the rear seat is folded flat. And with its rear door sill only 18 inches from the ground plus its wide-opening twin rear doors, it is probably the easiest vehicle on the road to load.

No wonder more Mini Estates are taken to picnics, cricket matches, point-to-point and on country town shopping expeditions than any other estate car. It’s the biggest estate car in the smallest dimensions, the neatest and nippiest load-carryer on the road.
Mini City

The Mini City is the small car that combines the last word in sophistication with ultra-practicability. It is a car that packs in the smallest space. It's a car that can be driven through traffic like a swift. It wastes less fuel than most other cars on the road when it's forced to idle in a traffic jam. It has all the headroom that a six-footer needs and the six cubit-foot boot takes all the shopping, luggage, school gear and picnic equipment that anyone could want.

But the most important thing about the new Mini City is apparent only when you take the wheel: the exhilaration it brings back to driving. For this is a spirited and merrymaking steed. This is the thoroughbred that is fun to ride!

The instruments are cleverly grouped where you can clearly see them. The town driver has no time to waste — nor concentration to spare.

Sunvisors include a vanity mirror for the front passenger and a handy ticket pocket for the driver.

As neat as it is nippy, the Mini City wears its name on its side.
**Mini HL**

**Engine:** 4-cylinder, transverse, o.h.v. In unit with clutch, gearbox and final drive. Bore 64.58 mm; stroke 76.20 mm; Capacity 998 cc. S.U. type HS6 carburettor, 38 b.h.p. at 4,750 rev/min*; maximum torque 7.12 kgm at 2,000 rev/min*; compression ratio 8.3:1.

**Clutch:** Diaphragm spring, 18.4 cm diameter. Hydraulically operated.

**Gearbox:** 4-speed, all synchromesh on forward gears, remote control centre-floor gear change lever. Ratios: first 3.647; second 2.185; third 1.425; fourth 1.000; compression ratio 8.3:1.

**Final Drive:** Front-wheel drive with pre-lubricated universal on open shafts. Ratio 3.44:1.

**Steering:** Rack & pinion. Four spoke steering wheel. 

**Wheels & Tyres:** Pressed steel disc 145 SR 10 radial-tyre tyres.

**Brakes:** Dual-line, hydraulically operated. 17.8 cm diameter drums all round. Two leading shoes at front, leading and trailing at rear.

**Suspension:** Independent all round. Cone rubber springs and telescopic hydraulic dampers.

**Electrical:** 12-volt battery. Alternator. Multi-purpose light with a right-hand seat belt. Centre hood horns, headlamp flasher, dip-switch and self-cancelling direction indicators. Lever on left-hand of steering column controls electric windscreen washer and two-speed windscreen wipers with flick-wipe facility. Hazard warning lamps, Electrically heated rear window, fresh-air heater/defroster and combined ignition/starer switch incorporating steering-column lock. Reversing lamp.

**Instruments:** Speedometer. Fuel and water temperature gauges. Warning lamps to show flashers, hazard warning lamps, headlamp high-beam, heated rear window on, brake line failure, low oil pressure and no charge.

**Optional Extras:** Automatic transmission. Black paint finish. Metallic paint finish.
