In the late 1960's Charles Cooper and his son John started the Cooper Car Company from a small BMC garage in Sidmouth, to design and construct racing cars.

They started with the Cooper 500, an innovative racer with a 500cc rear mounted engine, and with drivers like Stirling Moss who won many championships. Orders flooded in from all over the world and the company expanded rapidly. Cooper cars were being raced by all of the great front line drivers - Brabham, McLaren, Fangio, Hawthorn, Salvadori, Surtees, Stewart and Bhim.

Successful in Formula III and sports car racing, Cooper went on to race in Formula II. Then in 1958, Stirling Moss won the Argentine Formula I Grand Prix in a Cooper Climax.

Cooper cars became the world's largest holder of purebred racing cars and were Formula I World Champions three times - in 1959 and 1960. The era of the rear engined racing car, pioneered by Cooper, was definitely here to stay.

Cooper's Championship winning drivers were already using Minis as road cars and they realised the racing potential this little car would have, with more power. Cooper fitted the Mini with a 1000cc Formula Junior engine, basically the same BMC A-series unit used in the Mini. They approached the Chairman of BMC with the prototype.

Initially unsure of selling the 1,000 cars needed to be made to qualify the model for racing, BMC eventually went on to produce 150,000 Mini Coopers.

The Mini Cooper was successful in many forms of motorsport racing and rallying and production lasted until 1971.

In the mid 1980's the Mini Cooper began to regain popularity with a new generation of enthusiasts, mainly from Japan.

Rover Japan were keen to capitalise on this interest and commissioned John Cooper to build a new 1275cc Mini Cooper. The completed car was sent to Japan, meeting with immediate approval. Rover GB however were not convinced the time was right to manufacture the little legend.

Japan now looked to us for 1000cc racing kits for Mini Mayfairs etc. These were sent to Japan in elaborate wooden boxes and over 1,500 were sold.

Prompted by this success Rover met with John and Mike Cooper to discuss the supplying of UK and European Markings with the Cooper Conversion Kit. Rover extensively tested the conversion and gave full backing and warranty for the project. A Special Edition Series the “Mini Racing” was launched by Rover to further give the Mini the “Cooper” look, our kit featuring as an optional extra available through all Rover Dealers.

The next step was the return of the 1275cc Mini Cooper. First in carnetine form in 1990 – the car became an instant success. At this time John Cooper launched the "S Pack" to complement the new Cooper. The 1.3 Injection Cooper followed, fitted with a 5 way car to keep up with modern emissions. It confirmed perfectly and of course the "SI" pack was produced to give this car an extra boost.

The story continues with the new 1997 Mini Cooper S now available direct from John Cooper.

See next spread for details.
The new 1997 Mini Cooper S is in every way as exciting as the Cooper S was in the 1960s, but now, an incredible 35 years on, this amazing little car boasts many of today’s safety features. Now equipped as standard with a driver’s airbag, pre-tension seat belts and high strength door beams, this latest Cooper S fulfills all the criteria of a modern ‘90s car.

Two New Models
1997 brings you 2 new exciting Cooper S models, available exclusively from John Cooper Garages, the Cooper S Touring and the Cooper S Sport S.

Two different models but both still offering immense driving pleasure and excitement. These models come with all the latest safety features and a host of additional equipment as standard.

Luxury front reclining seats are fitted with a tilt forward mechanism allowing easy access to the rear. The walnut dashboard, leather steering wheel, alloy wheels, these are just a few of the exciting features found on our new Cooper S range.

Now with twin point fuel injection and many more other engineering developments, the 1997 Mini Cooper S is truly a brilliant achievement in small car packaging. Both our Cooper S Touring and Sport S can be ordered in a wide range of exterior paint colours with 12 exciting colours to choose from. Standard Monaco cloth trim gives a light and airy feeling to the car. But as an option, you can choose either the rally black leather seating or one of the range of classic leather colours. (Please see our Sales Team for all the exterior and interior colour options.)

MinipassionMini.com

Both the Touring and the Sport S come with our latest developments for the renowned S Series engine.

With twin point fuel injection, and many engineering changes and enhancements, John Cooper Garages are proud to boast a power output exceeding 85 BHP and a torque figure which is over 20% up on the standard Rover Cooper. Together with the immense hike in performance, improvements have been made to the handling and suspension.

For the 1997 Cooper S Touring the fitting of 165 Dunlop tyres makes handling electric. Of course our Sport S is fitted with Rover’s Sports Pack with its massive 175 x 90 x 13 (tires) and 13 x 6 alloys wheels.

The most exciting news for our ’97 Mini Cooper S Sport S is the addition of a Jack Knight 5 speed gearbox. For the first time you can purchase a Mini Cooper S with a 5 speed gearbox as standard. This gearbox has proven to be much more many years of testing and improvements have been made. In fact John Cooper’s relationship with Jack Knight spans many years, from the early days when Jack Knight supplied gearboxes for the Cooper Racing Teams. The combination of the extra power and 5 speed gearbox ensures that the Cooper S Sport S really is a thrill a minute.

Apart from the luxurious walnut dashboard, the new Cooper S comes with many other features as standard, such as wood trim and door pulls which grace the interior whilst John Cooper alloy door furniture ensures the sporty exterior is carried through to the interior.

There are numerous other features including door sill trims, wing mirrors with electrically adjustable, power steering and power central locking.

Please contact the nearest John Cooper Dealership for further details.
When you buy a new Cooper S from Cooper Garages we will order a new Cooper S SL from Rover, register it as new in the owner's name and convert the new car to a full Cooper S specification either Touring or Sport S. All of this work is carried out at John Cooper Garages and the development work has been carefully scrutinised by Rover. All the conversion work is covered by John Cooper's warranty with Rover's warranty unaffected for the remainder of the car. Each car is individually built, tried and tested and comes with its own numbered Chassis Plate for authenticity.

**Mini Cooper S Touring**

The Mini Cooper S Touring, whilst sharing the powerful 85 horse power engine retains Rover's 4 speed gearbox with its 2/7 gearboxes final drive, giving you smooth and relaxed long distance driving and together with the gains in the torque, ensures a fast get away when required.

**Touring Spec**
- 85 BHP Engine
- 4 Speed Gearbox
- 165 x 60 x 13 Tyres
- Colour Coded Wheel Arch

When you have decided between the Cooper S Touring and Sport S and chosen the exterior colour you would like, there are of course the options of leather interiors together with a full range of John Cooper after market accessories which can be fitted to your car.

When ordering your new Cooper S, our Sales Team will be happy to answer all your questions regarding the vehicles and all the accessories available.

All performance output figures John Cooper Garages
As well as producing the new '97 Cooper S, John Cooper Garages are able to undertake high quality special build projects.

One of these was our very successful Mini Cooper Grand Prix Limited Edition, built to celebrate the 35th Anniversary of Cooper racing cars winning the Formula One 'Grand Prix' World Championship. Only 35 Grand Prix Minis were built, launched at the NEC Motor Show. The Grand Prix took pride of place on the River Stand. With all 35 now delivered, the Project has proved a tremendous success.

**Other Personal Specials**

John Cooper Garages are able to undertake many special conversions carried out to customer specifications. Many Mini enthusiasts recognize John Cooper Garages as the mini-godfather of unique styling and performance together with tasteful interior fittings.

Listed below are a few examples of work already carried out by our experienced team.

- All Engine Conversion Work. In addition to the engine packages offered, John Cooper Garages undertake special projects for those wishing to obtain even more power from their Mini Cooper.
- Full Colour Resprays. Flat, metallic or pearlescent paint finishes carried out by trained experts using the latest hi-tec equipment.
- Resto-rarpures as MK 1 and MK II 60's Cooper
- Common Bulb Dashboards and Interiors
- Built-Up Sound Systems
- Leather Bound Wilton Carpets

---

**Air Conditioning**

John Cooper Garages offers a full air conditioning fitting service for your Mini. A virtually maintenance free system adds superb comfort to driver and passenger for those lazy hot summer days. Fitting is carried out by John Cooper Garages.

Air Conditioning is now available for the UK and European specification for the 1997 Mini.

Air conditioning can be ordered as a factory option for Japanese specification Cooper. (For export only)

---

**The Future**

It now looks almost certain that the Mini will continue right up to its 40th birthday which no other car in history has achieved. John Cooper Garages will continue to produce conversions and accessories for every aspect to do with the Mini Cooper up to and beyond the turn of the century.

MinipassionMini.com
John Cooper conversions are now world-renowned for quality and reliability.

Our latest engine conversion is available for your 1997 Mini Cooper as fitted to our 1997 Cooper S models.

1997 Cooper S Kit
MCC 1275 ST
As fitted to our 1997 Mini Cooper S models, this engine performance kit increases power output to 85 BHP. Available as a supply and fit option, the kit includes large valve, fully ported 5-stake cylinder head, high performance exhaust, improvements to fueling and induction and many more features. For BHP and torque figures, see details on 1997 Cooper S. Not shown. (Available for 97+ models.)

Cooper 'S' Plus
MCC 1275 STS
An enhancement of our 'S' Pack but with a boost in power to 77 BHP! This is achieved with larger inlet valves fitted to the polished and ported cylinder head and the addition of hi lift valve rocker assemblies. An oil cooler kit is also included together with Cooper S decals and authenticity chassis plate. (Available for 1275cc 1992-1996 models.)

82BHP Cooper S Kit
MCC 1275 SD
As 'S' Plus but alterations to induction and management systems raise power output to 82BHP! (Available for 1275cc 1992-1996 models. Not shown.)

Cooper S Pack
MCC 1275 ND
Open up the bouquet of a Cooper fitted with the S pack and instantly you will notice the similarity with the original Cooper S of the sixties. Our exchange performance cylinder head, new performance LCB exhaust manifold and system together with twin 1.25" SU carburators and authentic air cleaner achieves 77 BHP. As hi lift rocker cover is included as are Cooper S side decals. (Available for 1275cc 1990-1992 carburator models.)

1400 cc Carburator Kit
MCC 1400 BC
The John Cooper 1400 cc conversion is the ultimate for road going Mini Cooper. Each engine is meticulously prepared and includes many advanced modifications. Once fitted at our Workshop your carburator Cooper will produce over 115 BHP with 6-60 mph reachable in 7.95 seconds. For more information, contact our Technical Department. (Available for 1999-1992 carburator models.)

1000cc Kit
MCC 542
A very successful conversion that inspired the return of the Mini Cooper. When fitted, power is boosted by an incredible 50% to 60 BHP - and it runs on unleaded too! Each kit includes a large valve, polished and ported cylinder head, a performance LCB and exhaust system. Twin 1.25" SU carburators with 8 & 8 filters and an alloy rocker is also included. (Available for 1000cc pre '92 models.)

Quick Shift
MCC 303
KLV gear lever for those more accurate gear changes.

Oil Cooler Kit
MCC 517
Complete oil cooler kit for injection Mini Cooper.

Right Hand Tank
MCC 592
Manufactured in light alloy, these tanks come complete with fitting kit and locking fuel cap. This tank is for carburator cars only and may be supplied mail order. For injection cars we can supply and fit only. Please ask for details.

5 Speed Gearbox
MCC 000
Jack Knight, famous for his engineering skills during the '50's and '60's, built many gearboxes and other parts for the Cooper formula racing team. We are therefore proud to offer the JK 5 speed helical gearbox, complete with final drive. As an option for more powerful conversions you may specify the straight cut version.
**Handling and Performance**

**John Cooper Up-rated Brake System**
- **MCC 564**
- Not for 1997, this new up-rated brake system will reduce breaking distance when fitted to your Mini Cooper. It includes new alloy 4 pot John Cooper brake calipers together with vented discs, brake pads and rear alloy brake drums.

**MCC 568**
- Shoe brake system minus rear drums.

**MCC 394**
- 1 pair alloy rear drums.

**165/60 x 12 Tyres**
- **MCC 626**
- Developed by Dunlop for the Cooper, available through John Cooper.

**Alloy Wheel**
- **MCC 633**
- Spectrum alloy wheel available in 5 x 12 or 6 x 12 complete with 4 wheel nuts, Cooper wheel badge and centre cap.
- Please note when fitting these alloy wheels with 165 tyres, modification to body work is required, together with removal of MCC 209 wheel arch kit.

**Wheel Arch Kit**
- **MCC 335**
- As used on our Limited Edition Grand Prix Cooper. Sold as complete set of four. (Not shown).

**Alloy Wheel**
- **MCC 620**
- Alloys wheel 5 x 12 a direct replacement for 13" wheels which fit with standard tyres without need of wheel arch extensions and wheel arch modifications.

**Cooper Wheel Badges**
- **MCC 511**
- As used on original Cooper racing cars. Supplied as a set of four, ready to fit.

**Locking Wheel Nuts**
- **MCC 234**
- Set of four locking wheel nuts to protect your standard Mini Cooper alloy wheels.

**Negative Camber**
- **MCC 59**
- Negative camber arms designed to alter handling characteristics.

**Adjustable Ride Height Kit**
- **MCC 292**
- Allows you to choose a lower ride height for your car with a simple turn of a key. Comes complete as front and rear kit. Enhances handling and overall appearance.

**Cooper Valve Caps**
- **MCC 498**
- Set of 5 stainless valve caps with Cooper centre logo, a finishing touch.

**John Cooper Steering Wheels**
- John Cooper steering wheels are made to exacting standards by the famous Stevenage company. Each wheel sports the John Cooper signature.
- All wheels are 18" and come complete with fitting boss and polished Cooper centre cap. (Bosses for earlier Coopers may also be specified).
- (Not suitable for 1997 Mini Cooper models fitted with driver's airbag.)

**Wood Dished**
- **MCC 239**

**Leather Dished**
- **MCC 6**

**Wood Flat**
- **MCC 498**
John Cooper car seats and interiors offer the ultimate in car comfort, luxury and style. We now feature a range of leather panels and top and bottom dash rolls to match your 1997 Rover black leather or classic leather seating.
