MINI LE AND CLUBMAN LE INCORPORATE THE NEW FEATURES NOW TO BE FOUND ON ALL MINIS

Always a hands down winner with mini-sized cost yet family-sized space and comfort, these new features make Mini/Clubman a better buy than ever.

Multi-purpose stalks on the steering column control windscreen wipers (2 speed plus flick-wipe), electric washers, horn, dipswitch and headlamp flasher and self cancelling indicators. Hazard warning lights, heated rear window, and fresh air heater/demister are standard; as are face level vents, ignition/steering lock, and larger clutch and brake pedals.

Front and rear subframes are rubber insulated and revised damper settings and spring rates give a softer, quieter ride, aided by extra sound deadening material.

But the basic Mini formula remains as before. Economical, a joy to drive thanks to front wheel drive stability, precise steering, four speed synchronmesh transmission, and of course, its astonishing compactness.

Any alterations from the specifications on these pages are a result of New Zealand Motor Corporation policy of continual model improvement and may occur at any time without notice.
